

Smart Luggage Wrapping

Machine + Software

WRAPPO Combines Two Powerful Technologies

The WRAPPO Smart Machine & Its Integrated Business Management Software

WRAPPO is a next generation platform designed to transform luggage wrapping operations through the fusion of smart hardware and business management software. It delivers a superior customer experience while simplifying the oversight of machines, personnel, finances, and security.

WRAPPO combines two powerful technologies: the WRAPPO smart machine and its integrated business management software.

These two parts work in unison and are fully customizable to meet the demands of your business.

wrappobag.com

Precisely manages wrapping cycles with superior accuracy in flat lap and stop points, based on plate rotations, duration, plastic meters consumed, and suitcase weight for consistent, high-quality results. Manages door openings intelligently via an electronic smart lock, triggering audible alarms and email notifications for unauthorized access.

Operator access control assigns roles like supervisor, employee and maintenance with specific privileges, logging all actions. Time tracking report of the employees

Replaces physical buttons with a 19-inch touchscreen PC for machine operation.

Features a modified Programmable Logic Controller for additional hardware and software integration.

Equipped with a brake that engages milliseconds before the plate engine to prevent plastic outflow, an emergency button with LED, and an ON/OFF key switch.

WRAPPO MACHINE

Offers versatile payment options, including cash, credit card, voucher, combined methods, or complimentary services, with optional readers for banknotes and credit cards. Beyond sales, the system functions as a full CRM software, supporting over 2,000 products with customizable prices in three different currencies, advanced promotions, and bundled offers — all manageable directly by the admin.

Enables cycle repetition, promotional or technical tests without impacting accounting, and real-time declaration of insurance codes. Operates seamlessly in online and offline modes, with offline data synchronization via USB by authorized operators upon restoring internet connectivity. No Internet, No problem!

Supports secure identity verification through code entry or fingerprint recognition.

Captures photos and videos of operations to enable effective staff monitoring.

Prints receipts via a thermal printer, accommodates multi-currency payments, and handles multiple suitcases per ticket.

Business Management Software

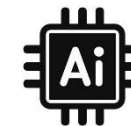

wrappobag.com

Offers complete inventory management: from order requests to purchase tracking, shipping with tracking numbers, station delivery, and automatic local stock updates with each sale, ensuring efficient and real-time control of product availability.

The software also provides complete post-sales management: from sales declarations by vendors to station cash flow tracking, bank reporting, and reconciliation — all within a unified, non-editable workflow covering product loading, sales, bank deposits, and declaration reconciliation.

Facilitates data export to Excel and monitors cash flow from vendor accounts to bank deposits. Allows dynamic pricing adjustments for suitcases and additional products. Artificial Intelligence integration for a predictive analytics for efficiency and cost savings

Displays suitcase weight alongside corresponding photos and videos to ensure verification of wrapping cycle consistency. Tracks inventory, roll orders and purchases.

Sends automated daily sales summaries via email. Configures customizable alarms via Slack or emails for events such as machine inactivity or delayed operator returns from breaks.

Ensures high-level security with automated daily, weekly, and monthly data backups. Encrypted data, scalable performance

Features a modular architecture for rapid customization, including integration of bespoke features, company logos, or branding.

Value propositions

AIRPORTS

Faster passenger flow
Security compliance & theft reduction
Higher revenue through efficiency

HOTELS OR POI

Extra service for guests (convenience + revenue stream)
Seamless integration with room charges

OEM

Machines bundled with WRAPPO as a premium package generate SaaS income.
Competitive Differentiation
White-Label Ready machines

Our Global Presence

Airports ✈️ Car Rentals 🚗 Parking P Hotels 🏨

With over 15 years of experience in the global market, we have established a strong presence in key countries including Brazil, Mexico, Italy, and the USA. Our operations span airports, car rentals, parking facilities, and hotels, allowing us to provide reliable and efficient solutions to clients worldwide. This extensive experience reflects our commitment to quality, innovation, and customer

WRAPPO

Machine + Software

Optimizes your operations through the use of a smart luggage wrapping machine that is integrated with business management software. Enhances security, accountability, and efficiency with role-based access, detailed logging, and real-time reporting. Supports informed decision-making through comprehensive data on operations, sales, and staff activity. Ready to modernize your luggage wrapping operations with smart technology?
